Putting trust first, serving customers

公司简介

Company Profile

MatePacking

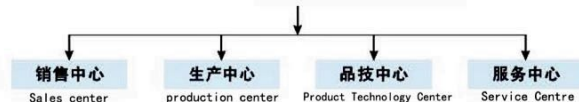

为满足公司快速发展需求，公司非常重视人才团队建设，从全球顶尖包装公司引进

To meet the rapid development needs of the company, the company attaches great importance to talent team building. Introduce senior technical experts and management teams from top packaging companies worldwide to engage in research and development as well as management work. And recruit and cultivate reserve forces from various professional higher education institutions.

公司组织架构由四大部分组成，销售中心、品技中心、生产中心、服务中心。各职能中心运作执行相互配合、高速运转，来保障客户的产品质量和交期。

The company's organizational structure includes sales, quality & technology, production, and service centers. with functions collaborating efficiently to ensure product quality and timely delivery.

MatePacking

公司面向全国，积极拓展，在各区域设立办事处，以便更快、更便捷服务客户。

The company is expanding nationwide, actively opening regional offices to serve customers faster and more conveniently.

QMS质量管理体系

QMS Quality Management System

透水透氧仪WVTR & OTR testers

用于检测分析高阻隔薄膜的阻水阻氧效果，并且检测成品的透水透氧功能，确保产品品质、保鲜效果。

The effect of oxygen resistance of the high barrier film is analyzed, and to detect the permeable oxygen function of the finished product, and to ensure the product's quality and freshness effect.

摩擦系数仪COF tester

适用于测量塑料薄膜材料滑动时的静摩擦系数和动摩擦系数。通过测量材料的滑爽性，可以控制调节材料生产质量工艺指标，满足产品使用要求。

It is suitable for measuring the static friction coefficient when the plastic film material is sliding. Dynamic friction coefficient. Through the measurement of smooth material can control adjust material production quality process index, meet the use requirements of product.

高温蒸煮锅High retort oven

适用于适用于食品包装袋和相关薄膜等物品、胶粘剂、油墨等进行耐高温性能的蒸煮试验，也适用于食品科研单位作无菌包装试验的理想设备。

Applies to food packaging bags and other related films, glue adhesive, ink and other cooking experiment of high temperature resistance performance, and is also suitable. Ideal equipment for sterile packaging test for food scientific

气象色谱仪Gas chromatograph

用于监控原料（油墨、胶水中的溶剂种类及含量）并且监测加工过程中产品中溶剂残留含量及监控产品的气味，保障包装产品内容物的食品安全。

Used to monitor the raw materials (ink, glue, solvents and contents of the solvent.) And monitoring the residual solvent content and monitoring of the product in the process. The smell of the product, to protect the food safety of the contents of the packaging product.

Professional level
Product showroom

同质可回收包装
Mono-material Recyclable Packaging

材料结构：PE/PE, OPP/CPP

同质可回收，满足环保降塑新要求，可满足高阻隔要求，适用于各种食品，液体，服装或其他日用品的应用需求

Homogeneous and recyclable, meeting the new requirements of environmental protection and plastic reduction. Can meet the high barrier requirements. Suitable for the application needs of various food, liquid, clothing or other daily commodities packaging.

高温蒸煮包装
High Temperature Retort Pouch

材料结构: PET/NY/AL/RCP
PET/NY/ RCPP

可替换罐头硬包装, 适用于即食板栗、米饭、豆类、熟肉、酱料、熟面食、熟玉米等, 满足食物长效保质要求, 可加热

May replace hard packaging like cans, suitable for ready-to-eat chestnuts, rice, beans, cooked meat, sauces, cooked pasta, cooked corn, etc., meeting therequirements of long-term quality of food. Can be heated

蒸煮可微波包装
Microwavable Retort Pouch

材料结构:

PET/NY/ RCPP

透明高阻隔, 可微波炉加热
适用于各种米饭, 面食, 配菜, 肉酱, 板栗等预制食品包装

Transparent with high barrier, microwavable, suitable for all kinds of cooked rice, pasta, side dishes, meat sauce, chestnut and other pre-made food packaging

蒸煮吸嘴袋
Retortable Spout Pouch

材料结构:

PET/NY/AL/RCP
PET/NY/ RCPP

可替换罐头硬包装, 方便安全。
适用于各种肉酱、果酱、蔬菜泥等流质食品或宠物食品包装

May replace hard packaging like cans, convenient and safe. Suitable for all kinds of meat sauce, jam, vegetable puree and other liquid food or pet food packaging

纸塑包装

Paper-Laminated Packaging

材料结构: TOPP/PAPER/PE PAPER/PET/CPP
PAPER/PET/PE PAPER/PET/AL/PE

满足环保理念的需求,使包装更有质感,更显档次。适用于各种干果、糕点、零食等休闲食品包装

Meeting the needs of environmental protection concepts, making the packaging more textured and high-grade. Suitable for all kinds of dried fruits, biscuits, fast foods and other snacks packaging

烘焙食品包装

Bakery Food Packaging

材料结构: OPP/CPP OPP/VMPET/PE
PAPER/PET/CPP OPP/PAPER/CPP

适用于各类面包、糕点、饼干及膨化食品包装,可满足高透、保质、环保等定制要求

Suitable for all kinds of bread, cakes, biscuits and puffed food packaging, and can meet customized requirements such as high transparency, long shelf-life, and environmental-protection etc.

咖啡茶叶包装
Coffee & Tea Packaging

材料结构: Matte OPP/AL/NY/PE PET/VMPET/PE
PAPER/AL/NY/PE

满足咖啡、茶叶、麦片或其他营养补充剂的高气密性、高阻隔的要求，可加单向透气阀

Meeting the high air tightness and high barrier requirements of coffee, tea, oatmeal or other nutritional supplements. The one-way air valve or tin-tie can be added to the pouch.

透气阀
Breathable valve

休闲食品包装
Snack Food Packaging

材料结构: OPP/CPP OPP/VMPET/PE
PAPER/AL/NY/PE OPP/PAPER/PE

适用于各类干果、糕点、饼干及油炸食品包装，可满足高透、保质、环保等定制要求

Suitable for all kinds of nuts, cakes, biscuits and fried food packaging, and can meet customized requirements such as high transparency, long shelf-life, and environmental-protection etc.

真空冷冻包装

Vacuum / Freezing Packaging

材料结构: PET/NY/PE NY/PE

适用于大米、杂粮、生鲜食品等包装。通过材料工艺的改善,使包装防漏气,耐刺穿、耐压、耐跌落,使内容物更持久保鲜

Suitable for packaging raw rice, miscellaneous grains, fresh food, etc. Through the improvement of materials and processing technology, the packaging can be air-leak-proof, puncture-resistant, pressure-resistant and drop-resistant so that the contents can be kept fresh for a longer.

宠物食品包装

Pet Food Packaging

材料结构: PET/NY/PE Matte OPP/VMPET/PE
PET/AL/NY/OPP PET/NY/OPP

根据宠物食品的类别、克重、使用方式,提供蒸煮吸嘴袋、滑块拉链袋、四边封承重袋等各种切合实际应用的宠物食品软包装

According to the category, weight and usage of the pet food we provide various pet food flexible packaging suitable for practical applications, such as retort valve bags, slider zipper bags, Quad-seal heavy-duty bags, etc.

个人护理包装
Personal-Care Packaging

材料结构: PET/NY/PE OPP/PAPER/PE
OPP/VMPET/PE

适用于卫生巾、纸尿裤、湿巾、面膜、口罩等个人护理产品，通过内层特殊处理，使得产品的保湿、保香效果更佳

Suitable for personal-care products such as sanitary napkins, diapers, wet wipes, face mask etc. Through the special treatment of the inner layer, the moisturizing and fragrance preservation effects of the products are better kept.

异形袋包装
Free-shaped Pouch

材料结构: Any material spec., in any special shape

适用于各类材料组合，根据客户的各类特定产品，特定包装设备及特定生产工艺需要，提供针对性的，个性化差异化的包装方案

Applicable to all kinds of material combinations, according to clients' various specific products, specific packaging equipment and specific production process needs, we provide targeted, personalized and differentiated packaging solutions

嘴袋液体包装
Liquid Packaging Spout Pouch

材料结构: PET/NY/PE PET/AL/NY/PE
NY/PE

适用于液体奶、果汁、日化洗洁露等液体包装,可替代瓶体轻质经济类包装。嘴盖可根据产品类型定制不同形状、颜色,袋型可做企鹅包、直嘴直立袋,异形斜嘴袋等

Suitable for liquid packaging such as liquid milk, fruit juice, daily chemical detergent, etc. It can replace the lightweight and economical packaging of the bottle body. The spout & cap can be in different shapes and colors according to customized requests. The bag type can be a cheer-pouch, a doy-pack with middle spout, or a die-cut special shaped shoulder-spout stand up bag, etc.

直嘴直立袋

Straight mouth upright bag

斜嘴直立袋

Oblique mouth upright bag

企鹅包

Penguin bag

手挽设计更方便消费者使用
